The listed products are special dispersions for non-slip installation of EXPONA SIMPLAY Carpets.

Tackifiers that we recommend must be used in accordance with the respective manufacturer's specifications.

All the products that we recommend must be used in accordance with the respective manufacturer's specifications.

EXPONA SIMPLAY Carpets can also be permanently bonded in areas where heavy loads and high temperatures are to be expected. The choice of adhesive depends largely on the substrate and the ambient conditions and can only be assessed on an object-specific basis.

For this purpose, please contact objectflor Technical support.
